

COIN OF OLYMPUS

Whitepaper v1.0

1.

COIN OF OLYMPUS

COL is a deflationary token that has a utility of donating 5% of every transaction to the Binance Charity and burning 2% of the tokens from every transaction.

What is Binance Charity?

- Binance Charity is a Blockchain Charity Foundation is a nonprofit organization dedicated to achieving global sustainable development goals by adopting the power of blockchain technology.

- Charity donations help a lot in easing the suffering of people. COL aims to be a part of the charity donators and from there, expand its use case by deploying subcoins in the future which will have new utility. This method will help COL community grow and continue to donate a large sum.
